Objective - Coming from a non-tech background, I was inspired to learn to code after getting involved in building tech solutions at my previous supply chain role and being encouraged by other passionate coders. Over the past two years, I have been self-teaching full stack web development and practicing by making clones of various websites. My goal is to find a junior full-stack software developer position, but I'm open to any entry level front-end or back-end positions for my first role.

Project Experience

- **Trello Clone**
  - **Tech Stack:** Python/Django Backend with jQuery + vanilla JS Frontend
  - Implemented board, list and card creation, checkboxes, due date, drag + drop features and AJAX updates
- **Airbnb Clone**
  - **Tech Stack:** Ruby on Rails Backend with jQuery + vanilla JS + Bootstrap Frontend
  - Implemented host and guest functionality, listing and booking management features, host communication/chat with sockets, google maps integration
- **Reddit Clone**
  - **Tech Stack:** .NET C# Backend with NextJS/React Frontend
  - Implemented user registration, community and post creation, upvotes/downvotes, SPA + API architecture

Work Experience

<u>Hidrate Inc.</u>	Chicago, IL
Production Manager	Nov. 2017 - Jun. 2019
Sr. Supply Chain Manager	Jul. 2019 - Sep. 2021
Supply Chain Consultant	Oct. 2021 - Jan. 2023

- Initialized plans and solutions throughout supply chain operations to support company growth. Below are some key contributions in several areas:
- **Management:** Recruited and oversaw the supply chain team across two office locations (US and China), and ensured smooth operation in areas of vendor & product sourcing, sales forecast & purchasing, production scheduling, shipping & logistics and quality control.
- **Sourcing:** Sourced and onboarded new key manufacturers in China for new product needs.
- **Logistics & Shipping:** established a balanced shipping strategy to achieve significant freight savings as well as on schedule arrivals.
- **3PL management:** Led the transition of domestic 3PL provider, as well as the sourcing and onboarding of two international 3PLs in Canada and Netherlands.
- **Systems implementations:** designed new databases/workflows through Quickbase and led internal ERP system integration, which significantly reduced manual data entry and errors.
- **Sales forecast and purchasing:** established routine reports to review historical sales, form purchasing plans and manage ongoing production schedules.
